EDUCATION

University of Michigan, Ann Arbor, MI

August 2022 - May 2026

BS in Computer Science, Minor in Philosophy, GPA: 3.25/4.0

Relevant Coursework: Data Structures and Algorithms, Web Systems, 3D Tech Art and Animation, Intro Game Development, Extended Reality for Social Impact, Philosophy of Emerging Technology

Campus Involvement: Michigan Esports, WolverineSoft

PROJECTS

Custom Game Engine, Ann Arbor, MI

May 2026 - August 2026

- Built a Unity-inspired 2D game engine in C++, featuring a custom Dear ImGui editor, physics, and scripting.
- Integrated Box2D for rigidbody physics, colliders, and triggers.
- Enabled Lua scripting by binding C++ classes/functions via LuaBridge, and used SDL for cross-platform windowing, input, audio, and rendering.
- Designed a JSON-based serialization system (RapidJSON) for fast scene, actor, and component read/write.
- Built a headless automated test harness to drive the engine via console input and capture per-frame state, enabling repeatable regression testing of engine and gameplay logic

LEMON-LIMELIGHT, Ann Arbor, MI

March 2026 - April 2026

- Designed a singleplayer army-building puzzle game featuring real-time mob combat and dynamic puzzles using Unity and C# in a team of four.
- Iterated on tutorial and guidance systems, UI design, level design, and enemy behavior based on external playtesting insights to improve user experience and game flow.
- Implemented a flexible dialogue system using custom scriptable objects to support dialogue in gameplay.
- Modeled and textured 3D environment pieces and character assets using Blender.
- Utilized Jira to track tasks, manage bugs, and organize development workflows with team members in an Agile development environment over a 6 week timeframe.

CSE Simulator, Ann Arbor, MI

January - February 2026

- Built a fully interactive VR recreation of a university lab in Unreal Engine 5 using Blueprint Visual Scripting, delivering environment art and gameplay systems across a milestone-based schedule in a team of two.
- Integrated a reusable interaction/affordance framework (base Interact() component, LineTrace targeting with hover feedback), driving a dozen+ distinct interactable objects such as light switches, copy machines, and drawing on whiteboards.
- Designed lightweight NPC encounters using proximity-triggered look-at behavior and interactable characters.
- Iterated on mobility, lighting, pacing, and environmental mood based on in-VR playtesting.
- Completed a formal postmortem of the project's three-sprint production cycle, identifying workflow gaps and translating those lessons into a more disciplined, iterative cadence for future projects.

WORK EXPERIENCE

Visualization Studio, *Student Consultant*, Ann Arbor, MI

January 2026 - Present

- Provided general troubleshooting of extended reality hardware (virtual reality headsets, photogrammetry) and cloudpaging software to assist students.
- Conducted daily maintenance of virtual reality headsets, opening and closing procedures, assisted faculty with audio/visual setup during classes.

Saica Sushi, *Server*, Ann Arbor, MI

March - August 2022, June 2025 - May 2026

- Provided quality customer service through serving food and drinks to enhance the customer experience.
- Balanced multiple tasks under pressure such as hosting, serving, and bussing within a small team

ADDITIONAL

- *Relevant Technologies:* C#, C++, Python, SQL, HTML, CSS, Lua
- *Relevant Skills:* Agile development, Pub/Sub, Blueprint Visual Scripting, Blender, Unity, Unreal Engine 5, Jira
- *Languages:* English (Native or bilingual proficiency), Korean (Native or bilingual proficiency)
- *Interests:* Video games, Esports, Rock climbing, Pokémon, Detroit Lions, Go Blue!
